Abstract

1 Section

For this analysis we'll use the `penguins` dataset from the **palmerpenguins** package.(Gorman et al. 2014)

There are 344 in our dataset.

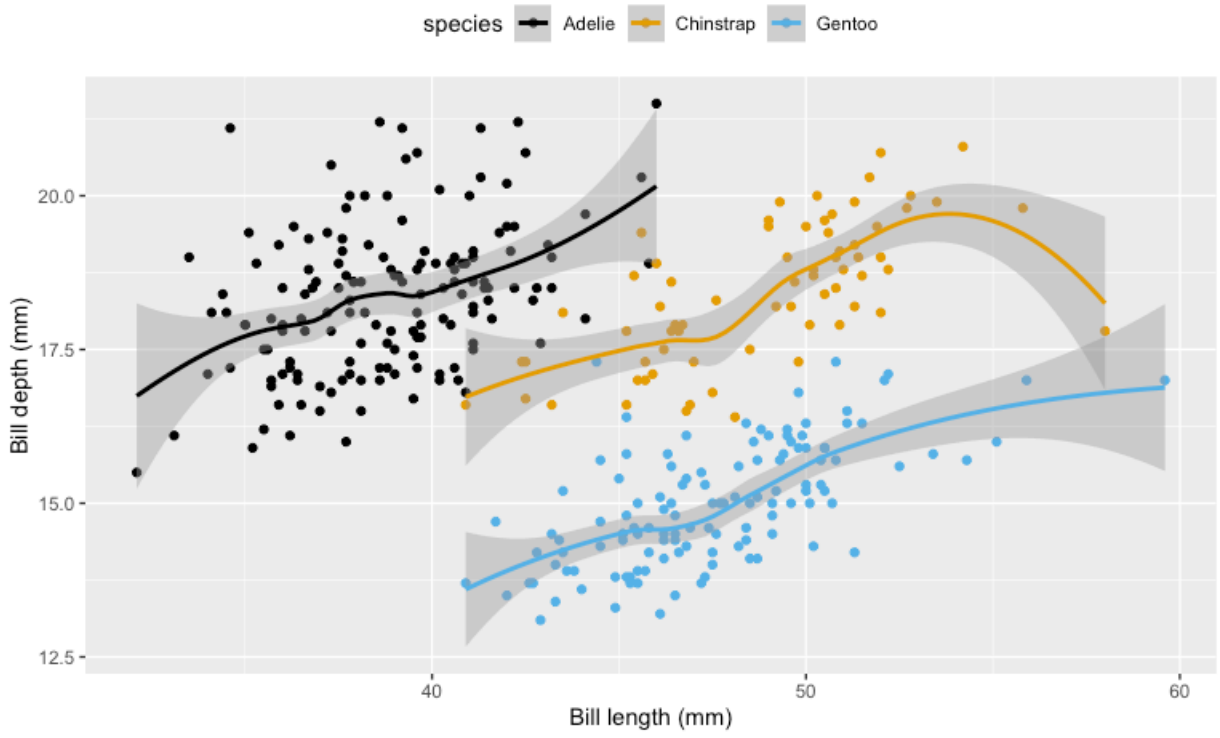

Figure 1: The relationship between bill length and depth of penguins is positive and relatively strong for each of the three species: Adelie, Chinstrap, and Gentoo.

Figure 1 shows something super interesting about penguins…
